

Spaghetti Competition was held by Civil Engineering Department at Ishik University. The competition was spectacular between ambitious groups. Ten groups attended the competition, the groups competed between each other according to the heaviest load that can be carried by their spaghetti bridge.

The bridge which has the first place carried 78 kg load, the one which has the second place carried 58 kg load, and the one which has third place carried 30 kg.

78 kg has been the national record among these kind of spaghetti competitions in Kurdistan. The groups which have the first, second and third places will compete as a representative of Ishik University against other representatives at Sulaimani University on 6<sup>th</sup> may. It will be the national competition between universities in Kurdistan. The members at the first group at Ishik University believe that their bridge will carry more than 78 kg at the national competition, who knows, it may come true.
