

Continuing Education Center is giving evening courses in Turkish, English and Arabic at the main building on Sundays, Mondays and Wednesdays from 5:00 to 7:30 pm. We give you an excellent language environment throughout these courses. Professional teachers and well-organized curriculum enable you to learn quickly. Ishik University is glad to offer these courses for both Ishik staff and other people from KRG who want to improve their abilities in these languages (English, Turkish and Arabic). We start these courses every year according to many applications received from individuals asking to have these lessons. Moreover, we expect to have more classes next year after giving current students all what they need linguistically and practically applied spoken language. Also we provide students with all materials required and equipment like books, smart board, data show, and authentic materials. We have started with English courses first and now we have three languages, hoping to expand classes to have different levels in each language.
